

NAB's petition 04-160 must be rejected! I live in America that is a free country where competition is the backbone of business. Since when can an organization like the NAB have any right to stop another business from improving themselves? Maybe the NAB should look at their practices and improve their business and leave others alone. I pay for XM Radio because I can't get what I want from the local radio stations. (By the way I pay for cable TV because I can't get what I want from the local TV stations). I travel and can use the weather forecast and traffic information that XM Radio supplies (and for which I am happy to pay for). Especially when I travel the mountain roads and can't even get a clear signal from the local stations. I would hate to get stuck in a snowstorm because the NAB wants to stop me from getting valuable information because they can't handle any competition. I should not even have to write this letter but since there are those who wish to take away my freedom of choice, I will. PLEASE OPPOSE PETITION 04-160! Thank you.
